

CONVEY

WE'RE UPGRADING!

As a progressive business we are always looking for ways to improve how we work and make a better working environment for all our employees. One way we will be improving things this year is to upgrade our employee records from Static records which are stored locally and used internally to Conveyable Records.

What Are The Business Benefits?

Businesses that upgrade to Conveyable Employment Records improve their Employee Value Proposition making it easier to engage employees. This results in increased levels of productivity, better punctuality, and a fall in the number of 'non genuine' sick days taken.

In addition we will be able to eliminate requests for references, attract more suitable applicants when positions become available, and be able to screen those new applicants using the CONVEY platform.

Why are We Upgrading?

Static records provide no long term benefit for our employees which becomes apparent if they decided to work elsewhere and they have to leave all the evidence of their achievements and contributions behind.

In direct contrast Conveyable employment records are digital files that CONVEY from one employer to the next allowing our employees to retain a history of their work accomplishments even if they decide to change employers.

CONVEYABLE employment records are being used by more and more businesses as a way to screen new applicants so by upgrading now, we are giving our employees the opportunity to build up a resource that they can carry forward with them. If their circumstances change (for example they move to a new area or just fancy doing something different) they will be able to show their records to other, potential employers giving them a significant advantage over other applicants.
